

# Future Skills Educators Workshop

**Tuesday 21st January 2025 | Sunshine Coast, QLD**

Join us on the 21st of January 2025 for the Future Skills Educators Workshop, a full-day professional learning event hosted by Groei and BOP. This collaborative workshop will bring together educators to explore innovative teaching strategies that equip students with the skills they need to succeed in the ever-evolving future of work.

Throughout the day, attendees will engage in hands-on sessions that guide them through the design thinking process, hear from inspiring industry leaders, and collaborate with peers to create impactful learning experiences. Together, we'll explore how to redesign curriculum and develop initiatives that foster key future-focused capabilities in students.

This workshop will also provide opportunities to build lasting partnerships with industry and the wider community, ensuring that the learning outcomes extend beyond the classroom and into real-world application.

# Future Skills Educators Workshop

## Explore The Program

Through workshops, seminars, and hands-on activities, Future Skills Educators Workshop attendees will have the chance to learn from industry leaders and experts, as well as collaborate and network with other educators. The Future Skills Educators Workshop is a unique opportunity for educators to enhance their knowledge and understanding of intrapreneurship, innovation, design thinking, and entrepreneurship education, enabling them to teach these 21st-century skills with confidence.

### Keynote Address

Attendees will be hearing from an industry leader as they unpack the emerging technologies changing how we live, work, and play, and share strategies for how we can help students navigate the rapidly evolving future of work.

### Professional Learning Session | How Might We...

Attendees will be challenged to develop a 'how might we' statement centred around how they can better help their students develop the skillsets, mindsets, and experiences required to thrive in the workforce of the future.

### Fireside Chat | Building Innovative Learning Experiences

We'll be sitting down with a selection of educators from the local community to hear their stories and experiences from building a culture of innovation in their communities and how they have worked to build a culture of innovation in their communities.

### Professional Learning Session | Design Sprint

Educators will have the opportunity to research how schools and communities around the world are tackling similar opportunities to the ones identified by our attendees. From here, they will engage in a design sprint where they will be tasked with ideating eight diverse solutions for their 'how might we' statement within their community.

### Soapbox Session | Industry Innovator

A selection of community and industry leaders will join us for a showcase opportunity. This will commence with each industry and community partner delivering a short 'Soapbox' on who they are, what they do, and how they can help innovative educators. From here, attendees will have the opportunity to connect with these industry leaders.
